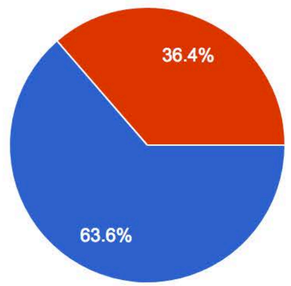
QUESTIONS RESPONSES 11

Options to be tested and decided

1) What is the link with mobility?

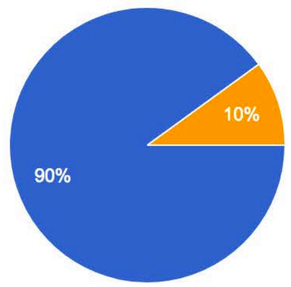
11 responses



- Option-1. Simpler Simulation: Shift from full car world into a walkable PEV world.
- Option-2. Enriched Simulation: Exploration of a multimodal world showing the impact of: Uber, PEV, Taxi, Public transportation, Private cars, Bikes, …
- Option-3: I don't feel qualified to answer this question

2) What data are we going to use in order to build the OD matrix and People behavior models and simulations?

10 responses



- Option-1. Data from NY.
- Option-2. Data from Barcelona
- Option-3: I don't feel qualified to answer this question

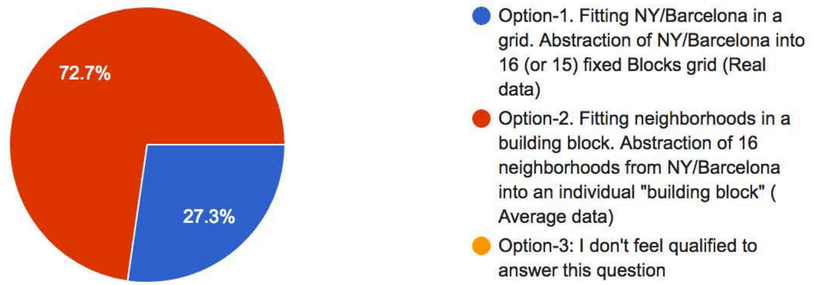
QUESTIONS | RESPONSES 11

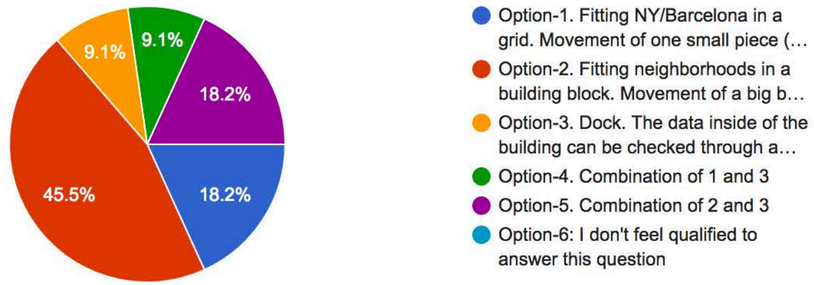
3) What will be represented physically in the table?

11 responses



4) How will be the dynamic table? (movement of pieces in the table)

11 responses



5) How will be triggering the data? (Changes of scenarios and datasets)

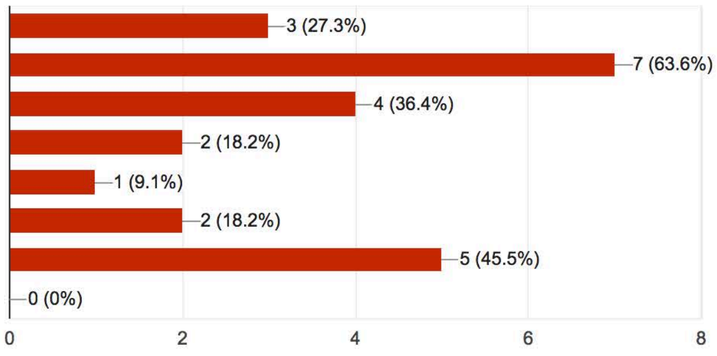
QUESTIONS | RESPONSES 11

7) How are we going to show the information? (New expresion design needs to be explore) "Multiple choices"

11 responses



8) What will be the shape, scale and measures of the table? (Materials where not mentioned at the meeting, but are important)

11 responses

QUESTIONS | RESPONSES 11

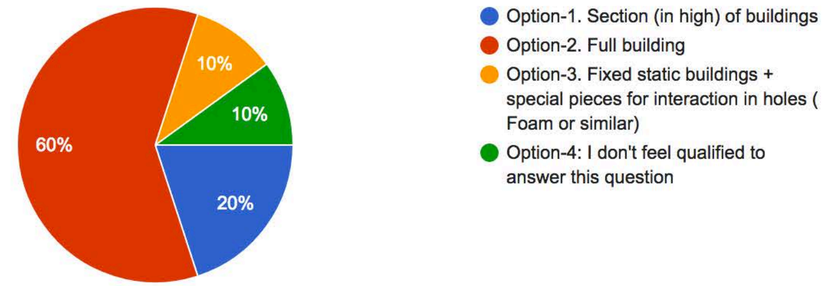
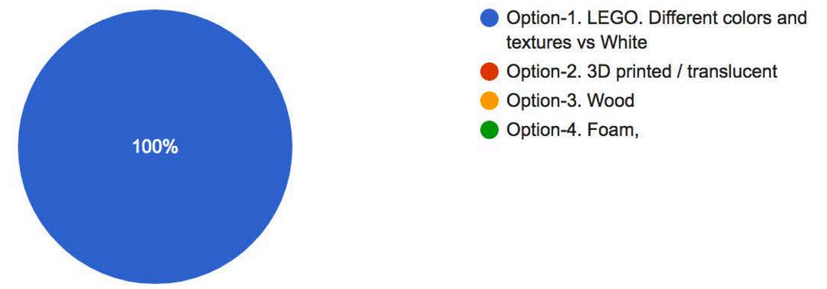
13) How will be the buildings on the table?

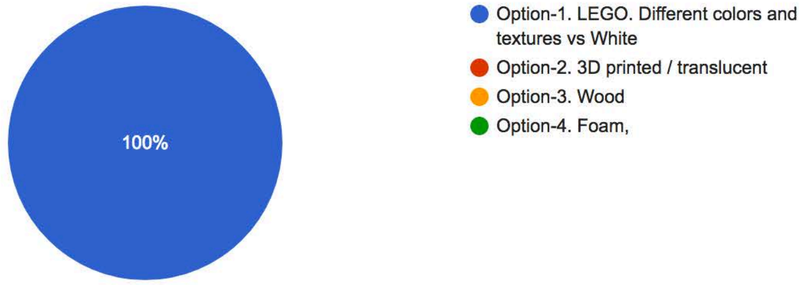
10 responses



14) What will be the material of the building?

11 responses





15) How will be the physical table? (Structure, materials, cables...)

6 responses

Like a museum's luxury piece

similar to CS tables but more robust for inner projection. Must be accessible for handicaps/children ergo lower than usual

HD Ratio made with 80/20?

Beautiful, simple, easy to understand. Any more in depth info can be in the exploration area - on ipad - ie we can have our website there with links to CityScope and papers etc. I will also ask City Science Network locations to help me updates their pages so that we have new, fresh info :) Finally, I defer to the CityScope team on all of these decisions but I have answered above as I would most like to see the tables (as a museum/ layman visitor)

Similar to Andorra

Same as the PEV - white and aluminum
